

**PRESS RELEASE: For Immediate Release**

**Data Innovations Releases Instrument Manager v8.11.10**

**May 31, 2011 - SOUTH BURLINGTON, VT:** Data Innovations announces the release of Instrument Manager™ (IM) version 8.11.10. Data Innovations is the worldwide leader in providing solutions that increase efficiency and improve workflow for the clinical laboratory with Instrument Manager™, Laboratory Production Manager™, and EP Evaluator™. This represents the most complete offering in the market for clinical laboratory data management.

Included in this release is functionality to help users be more efficient with processing specimens from SM Workspace. This includes additional operators for filtering and color coding data, and the ability to insert multiple coded entries simultaneously.

Bio-Rad Unity Real Time™ integration has been enhanced to support qualitative results and slide generations. A software security key has been implemented to support Instrument Manager deployed in a virtual environment.

For the complete listing of all the enhancements included in IM v8.11.10, refer to the release notes available via our Customer Web Portal (CWP) at [support.datainnovations.com](http://support.datainnovations.com).
